

When was the last time  
your theatre was  
inspected?

*Is your backstage equipment safe to operate? Are ropes frayed? If there were an emergency, would your fire safety curtain perform as it should?*

**Identify backstage hazards before an accident happens**

**Make safety a priority.** Schedule an annual inspection of your school's theatre to uncover faulty equipment and hazardous situations that could eventually develop into life-safety issues.

**Ensure safety.** You are responsible for the safety of your students, faculty, and audience. From ropes that move lighting overhead to flame proofing of curtains, it's imperative everything is in proper working order.

**Reduce liability risk.** Most states require an annual inspection of your entire facility. In any case, make annual inspections of your theatre a standard procedure in your loss/accident prevention program.

**Protect your investment.** Thousands of dollars are invested in your theatrical equipment and replacements are expensive. By identifying problems early repair costs can be minimized.

**Reply today to have us find a qualified inspector in your area**

J.R. Clancy can help you find a qualified rigging specialist in your area to inspect the condition of your backstage equipment. You'll be provided with a clear, written assessment so you can easily address any necessary repairs or replacements that need to be made. Ultimately, you'll have greater peace of mind knowing your theatre is as safe as possible.

### **Don't forget the training**

An annual inspection is just one component toward a safe entertainment facility. In addition, staff and students should be taught "the ropes" by instructors knowledgeable in the field of stage rigging and theatrical equipment.

If you would like to have your theatre inspected for safety and have a qualified rigging specialist contact you to discuss an inspection contact Tom Young at 1-800-836-1885 (9-5 EST) or email him at [tomyoung@jrclancy.com](mailto:tomyoung@jrclancy.com). Don't forget to ask about backstage safety training programs for staff and students.
