

**Underhung Loft Block
with Pivot Bracket
070-PIVOT**

- Pivot brackets are required for mounting on loft beams with more than $1\frac{1}{2}^\circ$ of slope.
- Use for beams 4" – $8\frac{1}{2}$ " (102 – 216 mm) wide for single line 55 series blocks.
- Mounting clips are included, please specify beam flange thickness.
- **Pivot brackets must be welded to loft beams after final alignment** – consult the factory for specific information.
