

SceneControl 5000 Series

New features, greater flexibility, and backed by quality since 1885

Our new generation of SceneControl 5000 automation consoles can effortlessly move scenery, lift platforms, fly performers, rotate turn tables, and control anything else that moves.

A New Generation of Automation Controls for Your Venue

J.R. Clancy's new **SceneControl 5000 Series Control Systems** feature sleek console design with a software platform that provides the best in functionality, control, and safety. Whether your venue is a grand opera house, middle school, or sports complex, there is a SceneControl 5000 series console for you that can be configured to move heavy stage equipment, fly performers, shift banners and everything in between. Features include:

Raynok Motion Control Software • This versatile and intuitive software interface provides operators the flexibility they require to program smooth and creative scene transitions.

Enhanced Safety Features • In addition to our standard safety features, such as Hold-to-Run Deadman Handles, we have added many new features including input/output error checking, and optional SIL3 level safety.

Advanced Security Options • You can set operator access levels and restrictions with unique passwords for logging, tracking, and maintaining the system integrity.

To learn how moving up to the SceneControl 5000 consoles will benefit you call today.
